jennifer ruth green history: The End of Empires and a World Remade Martin Thomas, 2024-03-19 A capacious history of decolonization, from the decline of empires to the era of globalization Empires, until recently, were everywhere. They shaped borders, stirred conflicts, and set the terms of international politics. With the collapse of empire came a fundamental reorganization of our world. Decolonization unfolded across territories as well as within them. Its struggles became internationalized and transnational, as much global campaigns of moral disarmament against colonial injustice as local contests of arms. In this expansive history, Martin Thomas tells the story of decolonization and its intrinsic link to globalization. He traces the connections between these two transformative processes: the end of formal empire and the acceleration of global integration, market reorganization, cultural exchange, and migration. The End of Empires and a World Remade shows how profoundly decolonization shaped the process of globalization in the wake of empire collapse. In the second half of the twentieth century, decolonization catalyzed new international coalitions; it triggered partitions and wars; and it reshaped North-South dynamics. Globalization promised the decolonized greater access to essential resources, to wider networks of influence, and to worldwide audiences, but its neoliberal variant has reinforced economic inequalities and imperial forms of political and cultural influences. In surveying these two codependent histories across the world, from Latin America to Asia, Thomas explains why the deck was so heavily stacked against newly independent nations. Decolonization stands alongside the great world wars as the most transformative event of twentieth-century history. In The End of Empires and a World Remade, Thomas offers a masterful analysis of the greatest process of state-making (and empire-unmaking) in modern history.

jennifer ruth green history: History, Practice and Pedagogy Susan Barahal, Elizabeth Pugliano, 2024-11-21 This edited volume explores the historical, practical and pedagogical possibilities for expressing and cultivating empathy through works of art. While aspects of what we today recognize as empathy has nestled in the artistic experiences and philosophies of all ages, the subjective and elusive nature of empathic responses has often resulted in the relegation of empathy to the margins of art historical inquiry. Moving into the second quarter of the twenty-first century, amidst global health crises, civic unrest, political turmoil, and persistent social inequities and injustices, this capacity to feel with and as someone or something outside of ourselves is more

critical than ever. Probing the very notion of empathy, contributions address themes ranging from environmental and social justice to identity and inclusion to transdisciplinary pedagogies and practices, each with a critical eye to how works of art not only appeal to empathic sensibilities, but might play an active role in developing capacities for empathy in viewers.

jennifer ruth green history: *The Material Interests of the Victorian Novel* Daniel Hack, 2005

Taking as his point of departure the competing uses of the critical term the materiality of writing, Daniel Hack turns to the past in this provocative new book to recover the ways in which the multiple aspects of writing now conjured by that term were represented and related to one another in the mid-nineteenth century. Diverging from much contemporary criticism, he argues that attention to the writing's material components and contexts does not by itself constitute reading against the grain. On the contrary, the Victorian discourse on authorship and the novels Hack discusses—including works by Thackeray, Dickens, Collins, and Eliot—actively investigate the significance and mutual relevance of the written word or printed word's physicality, the exchange of texts for money, the workings of signification, and the corporeality of writers, readers, and characters. Hack shows how these investigations, which involve positioning the novel in relation to such widely denigrated forms of writing as the advertisement and the begging letter, bring into play such basic novelistic properties as sympathetic identification, narrative authority, and fictionality itself. Combining formalist and historicist critical methods in innovative fashion, Hack changes the way we think about the Victorian novel's simultaneous status as text, book, and commodity.

jennifer ruth green history: *Beyond the Land* Melissa Weininger, 2023-08-29

A re-evaluation of the meaning and function of diaspora in contemporary Israeli culture. This thought-provoking exploration of literature and art examines contemporary Israeli works created in and about diaspora that exemplify new ways of envisioning a Jewish national identity. Diaspora has become a popular mechanism to imagine non-sovereign models of Jewish peoplehood, but these models often valorize

powerlessness in sometimes troubling ways. In this book, Melissa Weininger theorizes a new category of diaspora Israeli culture that is formed around and through notions of homeland and complicate the binary between diaspora and Israel. The works addressed here inhabit and imagine diaspora from the vantage point of the putative homeland, engaging both diasporic and Zionist models simultaneously through language, geography, and imagination. These examples contend with the existence of the state of Israel and its complex implications for diaspora Jewish identities and nationalisms, as well as the implications for Zionism of those diasporic conceptions of Jewish national identity. This dynamic understanding of both an Israeli and a Jewish diaspora works to envision a non-hegemonic Jewish nationalism that can negotiate both political imagination and reality.

jennifer ruth green history: An Anthropology of Biomedicine Margaret M. Lock, Vinh-Kim Nguyen, 2018-01-09 In this fully revised and updated second edition of An Anthropology of Biomedicine, authors Lock and Nguyen introduce biomedicine from an anthropological perspective, exploring the entanglement of material bodies with history, environment, culture, and politics. Drawing on historical and ethnographic work, the book critiques the assumption made by the biological sciences of a universal human body that can be uniformly standardized. It focuses on the ways in which the application of biomedical technologies brings about radical changes to societies at large based on socioeconomic inequalities and ethical disputes, and develops and integrates the theory that the human body in health and illness is not an ontological given but a moveable, malleable entity. This second edition includes new chapters on: microbiology and the microbiome; global health; and, the self as a socio-technical system. In addition, all chapters have been comprehensively revised to take account of developments from within this fast-paced field, in the

intervening years between publications. References and figures have also been updated throughout. This highly-regarded and award-winning textbook (Winner of the 2010 Prose Award for Archaeology and Anthropology) retains the character and features of the previous edition. Its coverage remains broad, including discussion of: biomedical technologies in practice; anthropologies of medicine; biology and human experiments; infertility and assisted reproduction; genomics, epigenomics, and uncertain futures; and molecularizing racial difference, ensuring it remains the essential text for students of anthropology, medical anthropology as well as public and global health.

jennifer ruth green history: Science Periodicals in Nineteenth-Century Britain Gowan Dawson, Bernard Lightman, Sally Shuttleworth, Jonathan R. Topham, 2020-03-02 Periodicals played a vital role in the developments in science and medicine that transformed nineteenth-century Britain. Proliferating from a mere handful to many hundreds of titles, they catered to audiences ranging from gentlemanly members of metropolitan societies to working-class participants in local natural history clubs. In addition to disseminating authorized scientific discovery, they fostered a sense of collective identity among their geographically dispersed and often socially disparate readers by facilitating the reciprocal interchange of ideas and information. As such, they offer privileged access into the workings of scientific communities in the period. The essays in this volume set the historical exploration of the scientific and medical periodicals of the era on a new footing, examining their precise function and role in the making of nineteenth-century science and enhancing our vision of the shifting communities and practices of science in the period. This radical rethinking of the scientific journal offers a new approach to the reconfiguration of the sciences in nineteenth-century Britain and sheds instructive light on contemporary debates about the purpose, practices, and price of scientific journals.

jennifer ruth green history: *Infertile Environments* Janelle Lamoreaux, 2022-11-18 In *Infertile Environments*, Janelle Lamoreaux investigates how epigenetic research into the effects of toxic exposure conceptualizes and configures environments. Drawing on fieldwork in a Nanjing, China, toxicology lab that studies the influence of pesticides and other pollutants on male reproductive and developmental health, Lamoreaux shows how the lab's everyday research practices bring national, hormonal, dietary, maternal, and laboratory environments into being. She situates the lab's work within broader Chinese history as well as the contemporary cultural and political moment, in which declining fertility rates and reproductive governance and technology are growing concerns. She also points to how toxicology in China is a transnational endeavor tied to both local conditions and international research agendas and infrastructures, which highlights the myriad scales and scope of epigenetic environments. At a moment of growing concerns about toxins, endocrine-disrupting chemicals, and climate change, Lamoreaux demonstrates that epigenetic research's proliferation of environments produces new kinds of toxic relations that impact multiple generations of humans.

jennifer ruth green history: *Soziologie sozialer Probleme und sozialer Kontrolle* Axel Groenemeyer, Silvia Wieseler, 2008-08-26 Soziale Probleme werden als öffentliche und politische Themen problematisiert; die in diesen Prozessen etablierten Repräsentationen bilden die Grundlage für Prozesse der Institutionalisierung neuer Realitäten, die z. B. die Form politischer Maßnahmen annehmen können und über deren Funktionen und Effekte sie sich reproduzieren und verändern. So schien es vielen Beobachtern und Beobachterinnen in den letzten dreißig Jahren, dass das Konzept ‚Soziale Probleme‘ soziologisch nur Sinn machen könne, wenn man es mit einem strikt konstruktivistischen Theorieprogramm und dessen Fragen nach der Prozessen und Bedingungen der öffentlichen Problematik sozialer Probleme identifizieren würde. Dieses Forschungsprogramm hat sich in den letzten Jahren zu einem fruchtbaren Feld theoretischer und empirischer Forschung entwickelt. Gesellschaftliche Konstruktion bedeutet allerdings nicht Beliebigkeit und Diskurse der Problematik sind genauso real wie ihre gesellschaftlichen, politischen und individuellen Konsequenzen. Mit ihnen befasst sich eine andere Soziologie sozialer Probleme, die sich der Analyse einzelner sozialer Probleme und der auf sie bezogenen Formen der

Politik, Intervention und sozialer Kontrolle widmet. Es ist genau diese doppelte Fragestellung, die die Soziologie sozialer Probleme und sozialer Kontrolle auszeichnet. Der vorliegende Band bietet einen profunden Überblick über den aktuellen Diskussionsstand in diesem wichtigen Forschungsfeld und reflektiert damit die Lebendigkeit und Fruchtbarkeit der Soziologie sozialer Probleme und sozialer Kontrolle.
