Moving beyond binary understandings that inform the militarization of culture thesis and examining various national and cultural contexts, the collection outlines ways in which a process of paramilitarization is shaping the world through the promotion of new warrior archetypes. It is argued that while the paramilitary hero is associated with military themes, their character is in tension with the central principals of modern military organization, something that often challenges the state’s perceived monopoly on violence. As such paramilitization has profound implications for institutional military identity, the influence of paramilitary organizations and broadly how organised violence is popularly understood
