life of pi publication date: *Animals in Literary Education* John Drew, 2025-09-24 This book examines the complicated place of animals in literary analysis and education and shows how an ethically engaged approach to animals' representation could be pursued to challenge anthropocentrism and cultivate multispecies empathy. Other species are represented in the literary education canon, including farmed animals. Yet the animals are typically anthropomorphized to guide students toward humanist readings and away from consideration of animals' experiences or subjectivities. This reproduces the idea that animals are mere objects meant to be exploited for human purposes, even metaphorical and educational ones. John Drew develops the term "anthropo-allegory" to capture and critique the process through which students are taught to read animal literary representations exclusively as symbolic analogues for humans and human themes. The concept serves as an analytical lens for critically interrogating significant texts taught across educational levels and exposing the deeply engrained educational anthropocentrism that silences animal issues, even when animals are represented. Crucially, Drew identifies texts and pedagogical strategies that can help cultivate a literary educational animal ethic that simultaneously encourages analytical rigour and multispecies concern.

life of pi publication date: *Reflections on Contemporary Life* Reza Noubary, 2019-07-29 It all started around sixty years ago when a young boy witnessed an earthquake that caused detrimental harm to an innocent community. The unfortunate event left a deep impression on him.

He couldn't forget that when he would ask about it, he would only be told that they must have done something bad to anger the god. Even though he was still young, he did not find the answer convincing. He then devoted almost all his waking moments to thinking about and making sense of what happened that day. He wondered what could have been done to prevent it, leaving him in a disarray of thoughts. This became a stimulant for his inquisitive mind and an incentive to strive to understand disaster-like events. In the case of earthquakes, his struggle resulted in two books and more than fifty research articles. The present book reflects the boy's (who is now an old man) life experiences and from looking at the world around him as an insider, outsider, majority, minority, winner, loser, believer, denier, single, married, student, teacher, son, father, grandfather, uncle, friend, and enemy. His quest for finding answers to his many questions led him to live and work in places such as Belgium, England, Germany, Italy, Iran, and the United States. In his pass/journey, he had to deal with a hard childhood, poverty, health issues (both physical and mental), revolution, war, shortage, pain and suffering around him, and the stress of learning different languages and adjusting to different cultures. Through these hardships, he learned a great deal about the dynamic aspects of life and the changes that take place accordingly. The book reflects all this together with his multicultural background and views on topics such as social values, living, faith, mathematics, sports, and health.
