marieb anatomy and physiology 11th edition: The Living Signature: The Body's Power to Heal and the Question of Design Dr. Octavian Caius Obeada, 2025-06-26 In *The Living Signature: The Body's Power to Heal and the Question of Design*, science and spirit converge in a captivating exploration of the human body as more than mere biology. Drawing from philosophy, theology, medicine, and biology, this book challenges the view that life is the product of blind chance. From the cellular dance of regeneration to the breathtaking orchestration of body systems, it reveals signs of purpose woven into the fabric of life itself. For the scientist, the skeptic, and the seeker alike, this is an invitation to see the body not just as alive, but as alive with meaning. I will praise thee, for I am fearfully and wonderfully made, wrote a grateful King David in Psalm 139 three thousand years ago. He didn't know the half of it. In this marvelous book, Dr. Octavian Caius Obeada focuses on the marvelous ability of life to regenerate and heal itself, surveying what philosophers and theologians throughout the ages have surmised, and detailing the intricate molecular mechanisms that have been discovered by scientists only in recent decades. The result is a tour de force showcasing the intelligent design of life. Michael J. Behe, PhD, Professor of Biological Sciences at Lehigh University in Pennsylvania and a Senior Fellow at Discovery Institute's Center for Science and Culture, and author of *Darwin's Black Box*. *The Living Signature* by Dr. Octavian Caius Obeada is a profound exploration of the human body's regenerative capacity, framed as both a scientific marvel and a philosophical clue to purposeful design. Drawing on decades of medical experience and insights from biology, theology, and systems thinking, the book challenges reductionist views by asking whether healing is merely mechanical, or a message of intention. With compelling case studies and a multidisciplinary lens, this work invites readers to see the human body not as an accident, but as a living signature of meaning and design. Adrian Anthony Dormans MD, FAAFP From skin and bone to organs and DNA, the regenerative capabilities of the human body are not only astonishing, they hint at something deeper. *The Living Signature* lays out thoughtful, well-researched reflections, and challenges you to consider whether the complexity and order we see in ourselves, could truly be the product of blind chance, or the body itself is whispering something about its origin, a message not of randomness, but of meaning. The chapter on the mind-body connection is particularly thought-provoking, raising important questions about the nature of consciousness and the reliability of human cognition. By challenging purely materialistic explanations, the author invites readers to consider the possibility of intentional design. This book is a fascinating and well-researched read for anyone interested in the intersection of science, philosophy, and the deeper questions of existence. Miya McCann Ed.D.(c), MS, RN, Assistant Chair for Hartwick School of Nursing, Assistant Professor

marieb anatomy and physiology 11th edition: Living with the Virus Ray Selva, 2011-08 UNAIDS reports more than one million Americans are living with HIV, and unfortunately more than 17,000 people died from it last year. Despite modern treatments and prevention, more than 50,000 people a year contract the virus, including author Ray Selva. Fortunately for Ray, he and his wife have developed a system of treatments to prolong their lives in spite of the affliction. Living with the Virus explores Ray Selva's personal experience with HIV infection and the current biological and social issues facing those who are infected. Ray describes how HIV is spread and can be prevented. He discusses common HIV medications, the side effects of those medications, the four stages of the virus's progression, and illnesses associated with each of those stages. 'Living with the Virus is a welcomed addition for patients and families coping with HIV infection and its complications, especially those who are newly-infected and feel overwhelmed. I look forward to sharing it with my patients.' John W. Baddley, MD, MSPH Chief, Infectious Disease Section Birmingham VA Medical Center
