**sociology in our times 11th edition reddit:** Gaming Democracy Adrienne L. Massanari, 2024-10-29 How play and gaming culture have mainstreamed far right ideology through social media platforms. From #Gamergate to the ongoing Big Lie, the far right has gone mainstream. In Gaming Democracy, Adrienne Massanari tracks the flames of toxicity found in the far right and "alt-right" movements as they increasingly take up oxygen in American and global society. In this pathbreaking contribution to the fields of internet studies, game studies, and gender studies, Massanari argues that Silicon Valley's emphasis on meritocracy and free speech absolutism has driven this rightward slide. These ideologies have been coded into social media spaces that implicitly silence marginalized communities and subject them to rampant abuse by groups that have learned to "game" the ecology of platforms, algorithms, and attention economies. While populist movements are not new, phenomena such as QAnon, parental rights activism, and COVID denialism are uniquely "of the internet," with supporters demonstrating both technical acumen and an ability to use memes and play as a way of both building community and fomenting dissent. Massanari explores the ways that the far right uses memetic humor and geek masculinity as tools both to create a sense of community within these leaderless groups and to obfuscate their intentions. Using the lens of play and game studies as well as the concept of "metagaming," Gaming Democracy is a novel contribution to our understanding of online platforms and far right political activism.

**sociology in our times 11th edition reddit: *The Oxford Handbook of George Orwell*** , 2025-01-29 *The Oxford Handbook of George Orwell* offers a wide-ranging reconsideration of Orwell's life and work, focusing on the extensive connections between his novels, essays, diaries, columns, letters, and reviews. Accessible to general readers and to established scholars alike, forty-eight chapters written by an international team of Orwell specialists address familiar topics-such as Orwell's journalism, broadcasting, literary criticism, and politics-as well as less well-trodden areas of his output, such as his accounts of stupidity, kindness, and justice, and his connections with contemporaries like Jack Common, Katharine Burdekin, Wyndham Lewis, and Victor Serge. Sections on Orwell's professional activities, his main literary influences, his politics, his intellectual fixations, his literary contemporaries, and his legacies structure the book, which moves thematically and topically through the full scope of his output. The first section looks at how Orwell spent his time as a writer, reader, and broadcaster. Chapters on writers from Shakespeare to the modernists investigate the determinants of Orwell's literary practice. The book then turns to a set of political contexts in which Orwell's writing can be understood. The 'Fixations' section covers the familiar, such as Orwell's account of Englishness, and the unfamiliar, such as his account of the absurd. The fifth section relates Orwell to several politically minded contemporaries, tracing connections and differences between their writing. The final section of the Handbook reflects on how Orwell sounds through several literary and socio-political legacies, and includes innovative considerations of feminism, Afrofuturism, and queer speculative fiction.

**sociology in our times 11th edition reddit: Digital Culture and the Hermeneutic Tradition** Inge van de Ven, Lucie Chateau, 2024-07-02 In our information age, deciding what sources and voices to trust is a pressing matter. There seems to be a surplus of both trust and distrust in and on platforms, both of which often amount to having your mindset remain the same. Can we move

beyond this dichotomy toward new forms of intersubjective dialogue? This book reevaluates the hermeneutic tradition for the digital context. Today, hermeneutics has migrated from a range of academic approaches into a plethora of practices in digital culture at large. We propose a 'scaled reading' of such practices: a reconfiguration of the hermeneutic circle, using different tools and techniques of reading. We demonstrate our digital-hermeneutic approach through case studies including toxic depression memes, the Johnny Depp/Amber Heard trial, and r/changemyview. We cover three dimensions of hermeneutic practice: suspicion, trust, and dialogue. This book is essential reading for (under)graduate students in digital humanities and literary studies. Labelling these modes of our experiential extractions, transactions and re-making of our mortal lives as posthuman capitalism, the book reviews the human entanglements from sociality, friendship, desire, memory, transgressions of privacy and co-production of value through the data economy. Offering innovative and interdisciplinary conceptualisations and vantage points on our contemporary data society, this book will be a key text for scholars and students in the areas of digital media, communication studies, sociology, philosophy and social psychology.

This question drives research in this interdisciplinary area of sound studies: it propels each main chapter of this handbook into a thoroughly different world of listening, experiencing, receiving, sensing, dreaming, naming, desiring, and crafting sound. This handbook is composed of six sections: sonic artifacts; sounds and the body; habitat and sound; sonic desires; sounds and machines; and overarching sensologies. The individual chapters explore exemplary research objects and put them in the context of methodological approaches, historical predecessors, research practices, and contemporary research gaps. This volume offers therefore one of the broadest, most detailed, and instructive overviews on current research in this area of sensory anthropology.

Gehl, Maria Bakardjieva, 2016-12-01 Many users of the Internet are aware of bots: automated programs that work behind the scenes to come up with search suggestions, check the weather, filter emails, or clean up Wikipedia entries. More recently, a new software robot has been making its presence felt in social media sites such as Facebook and Twitter – the socialbot. However, unlike other bots, socialbots are built to appear human. While a weatherbot will tell you if it's sunny and a spambot will incessantly peddle Viagra, socialbots will ask you questions, have conversations, like your posts, retweet you, and become your friend. All the while, if they're well-programmed, you won't know that you're tweeting and friending with a robot. Who benefits from the use of software robots? Who loses? Does a bot deserve rights? Who pulls the strings of these bots? Who has the right to know what about them? What does it mean to be intelligent? What does it mean to be a friend? *Socialbots and Their Friends: Digital Media and the Automation of Sociality* is one of the first academic collections to critically consider the socialbot and tackle these pressing questions.
