fort leonard wood basic training graduation dates 2023: Treading the Deep Bradley Jones, 2021-11-09 A directionless young man with an anxiety disorder enlists in the military—and accomplishes things he never expected—in this inspiring, entertaining memoir. In his wildest dreams, Command Sergeant Major (CSM) Bradley P. Jones never thought he would make a career

out of the military. Like many, he joined for the college tuition assistance. Secretly worried that his panic attacks might prevent him from making it through, he was nevertheless determined to serve out his first and only enlistment, and then move on to bigger and better things. He managed to leave the military—called a break in service—for four years, but the military never left his thoughts or his system. There was something about serving his country that constantly called to him through his missionary service in South America and then into his university studies. Bradley finally succumbed to that calling—reenlisting into an AH-64 Apache helicopter battalion near the university. From there, his service led to a career he loved—working on Apaches as a full-time federal employee, while starting a family with his wife as a newlywed. While serving in Kuwait on September 11, 2001, his life, along with those of millions of others in and out of uniform, changed. From that day, his career trajectory seemed to him to be predetermined, finally culminating in his appointment to serve his beloved fellow soldiers as the top enlisted member in the battalion. In *Treading the Deep*, Bradley Jones's humor and faith-promoting experiences restore our belief in the tenacity of the human spirit and its ability to ultimately overcome—no matter the trials or circumstances.

The storekeeper might have given Grace Mallory a fresh start and renewed her faith in God, but she'd made his house into a home. One filled with laughter, singing and the best home cooking in all of Missouri. And now Carl prayed for God's gift of grace once more. For how else would he ever find the key to unlock Grace's precious heart?

fort leonard wood basic training graduation dates 2023: Fifty Years from the Basement to the Second Floor Tom Colbert, 2023-10-06 In *Fifty Years from the Basement to the Second Floor*, Tom Colbert, former chief of justice of the Oklahoma Supreme Court, shares his extraordinary life story—a story of resilience, determination, and hope. From his great-great grandmother who, though born into slavery, lived to be over 100 years old to his great grandfather who fought to be enrolled as a member of Creek Tribal Nation to his grandfather who walked over a mile home after being shot in the chest, never giving up no matter how hard the journey was instilled into Tom at a very young age. Born on December 30, 1949, Tom was raised by his mother and grandparents in Sapulpa, Oklahoma, when segregation laws were in effect. In fact, a few days after Tom was born, Ada Lois Sipuel Fisher had just started her second semester as a law student at the University of Oklahoma Law School after fighting for three years to be admitted there, refusing to attend the makeshift “Black-only” law school set up in the basement of the State Capitol. Though racial segregation was deemed unconstitutional in 1954, integration was intentionally delayed in Tom's town, and he didn't attend an integrated school until the fall of 1965. Although some teachers at his high school were welcoming, many staff and students were not, and Tom and his friends experienced racism, bigotry, and hatred, despite being star athletes and diligent students. Though he grew up in poverty and a world entrenched in systemic racism as well as dealt with family tragedies, Tom beat impossible odds, proving the naysayers of his youth wrong. He not only worked hard and became an outstanding lawyer, but reached the pinnacle of judiciary—and became the first Black man in Oklahoma to do so. Just like Ada Lois Sipuel Fisher, Tom refused the “basement,” and that noble resistance led him all the way to the second floor of the Oklahoma State Capitol.

fort leonard wood basic training graduation dates 2023: *The Good, the Bad, and the Ugly* S. Saidah Bey, 2023-02-16 *The Good, the Bad, and the Ugly* is a story told by three sisters that takes place in a small community in Ellisville, Mississippi, in the Jones County--also known as the Free State of Jones. It begins with the birth of their mother and her siblings through their adulthood and departure from Mississippi. The center of the story was their mother and the life and time of being her children. She married at the age of seventeen. After finishing the eighth grade, she contemplated becoming a teacher, which was the requirement at that time for being an educator, but she decided that she would teach her own children. And that she did. It has taken almost four years to write this book including the time that they took thinking and talking about it. *The Good,*

the Bad, and the Ugly reveals the joys, the tragedies, heartaches, family miracles, disappointments, pains and tears, and southern racism. It spans almost one hundred years, and for them, from what they've heard, seen, and experienced, they were worth putting into words. A lot of this information came from their mother as they would sit and talk. Along with the conversations that the sisters had with everyday life, it was out of these situations that they decided to write this book. Every family has a story, and this is theirs. This book is meant to be a dedication as well as a salutation to each and every member of their family along with close friends and in memory of all those loved ones who had gone before them. Because without them, there would be no good, no bad, and no ugly. It is a southern story. Although a lot of things happened, the coolest and greatest thing besides knowing all of these special people is that they are their family.

fort leonard wood basic training graduation dates 2023: Breaking Point Rebecca Schwartz Greene, 2023-01-03 WINNER, SOCIETY FOR MILITARY HISTORY DISTINGUISHED BOOK AWARDS - FIRST BOOK This book informs the public for the first time about the impact of American psychiatry on soldiers during World War II. Breaking Point is the first in-depth history of American psychiatry in World War II. Drawn from unpublished primary documents, oral histories, and the author's personal interviews and correspondence over years with key psychiatric and military

policymakers, it begins with Franklin Roosevelt's endorsement of a universal Selective Service psychiatric examination followed by Army and Navy pre- and post-induction examinations. Ultimately, 2.5 million men and women were rejected or discharged from military service on neuropsychiatric grounds. Never before or since has the United States engaged in such a program. In designing Selective Service Medical Circular No. 1, psychiatrist Harry Stack Sullivan assumed psychiatrists could predict who might break down or falter in military service or even in civilian life thereafter. While many American and European psychiatrists questioned this belief, and huge numbers of American psychiatric casualties soon raised questions about screening's validity, psychiatric and military leaders persisted in 1942 and 1943 in endorsing ever tougher screening and little else. Soon, families complained of fathers and teens being drafted instead of being identified as psychiatric 4Fs, and Blacks and Native Americans, among others, complained of bias. A frustrated General George S. Patton famously slapped two "malingering" neuropsychiatric patients in Sicily (a sentiment shared by Marshall and Eisenhower, though they favored a tamer style). Yet psychiatric rejections, evacuations, and discharges mounted. While psychiatrist Roy Grinker and a few others treated soldiers close to the front in Tunisia in early 1943, this was the exception. But as demand for manpower soared and psychiatrists finally went to the field and saw that combat itself, not "predisposition," precipitated breakdown, leading military psychiatrists switched their emphasis from screening to prevention and treatment. But this switch was too little too late and slowed by a year-long series of Inspector General investigations even while numbers of psychiatric casualties soared. Ironically, despite and even partly because of psychiatrists' wartime performance, plus the emotional toll of war, postwar America soon witnessed a dramatic growth in numbers, popularity, and influence of the profession, culminating in the National Mental Health Act (1946). But veterans with "PTSD," not recognized until 1980, were largely neglected.
